The stockholders' equity of Tyron Company at the beginning of the day on February 5 follows.

Common stock—$20 par value, 150,000 shares authorized, 78,000 shares issued and outstanding	$ 1,560,000
Paid-in capital in excess of par value, common stock	525,000
Retained earnings	675,000
Total stockholders' equity	$2,760,000

On February 5, the directors declare a 10% stock dividend distributable on February 28 to the February 15 stockholders of record. The stock's market value is $46 per share on February 5 before the stock dividend. The stock's market value is $40 per share on February 28.

Requirement 2:
One stockholder owned 850 shares on February 5 before the dividend. Compute the book value per share and total book value of this stockholder's shares immediately before and after the stock dividend of February 5. (Round "Book value per share" to 2 decimal places and the other answers to the nearest dollar amount.)

	Before	After
Book value per share	$	$
Total book value of shares	$	$

Book Value per Share = Total Stockholders' Equity
                              Number of Common Shares

                                  $2,760,000
